aluminium male
fitting (ø 25 mm)

GS Composite carbon gangways are a leap forward in nautical accessory design and are the first gangways manufactured by the VARTM system. Their extraordinary design, technological innovation and practical value launched GS Composite carbon gangways into the top tier of nautical equipment manufacturers and are now a must-have aftermarket accessory. GS Composite provide a complete range of models and styles, with fixture/fitting options, custom colors, and teak surfacing all available along with a vast number of accessories. These gangways are fully customisable. In 2009 they were awarded the prestigious DAME Award for design and functionality.

CARBON GANGWAYS

New
innovative
gangway!

TWO SECTIONS
length 2,60 meters

THREE SECTIONS
length 3,20 meters

Technical details
Length: 260 to 320 cm
Width: 45 cm
Type: foldable, three section
Weight: from 11 kg
Floats on water!

Torsion free
construction

Anti-slip thread
with custom design

Acid resistant
wheels

The all-new and innovative three section carbon gangway is designed to be used either as a foldable gangway in 260 cm length, or can be quickly and easily extended to its full length of 320 cm. The versatile nature of this gangway assures that it can be used in many different situations. With a width of 45 cm and optional stanchion attached, the gangway provides a safe boarding platform even for boats over 50-foot. With this three section innovation, GS Composite created a new class of multi-purpose convertible gangways. And as any other GS Composite gangway, it can be fully personalized.

Custom engraving

Using the technologies acquired over many years of testing and development, GS Composite began production of carbon steering wheels using No bonding technology. GS Composite steering wheels are made as one part and are IMC certificated (International Marine Certification Institute), WCAPOO1/2 accordance with ISO 8848. To match the varying requirements of modern boat designs, there are two models of steering wheels: The Classic 4 spoke, ultra-slim steering wheel designed for elegant sailing yachts, and the Race performance wheel with 3 Y spokes designed for those with a race spirit.

CARBON ACCESSORIES

stainless steel 316
(ø 25 mm)

Female fitting
stainless steel 316
(ø 25 mm)

Durable storage bag

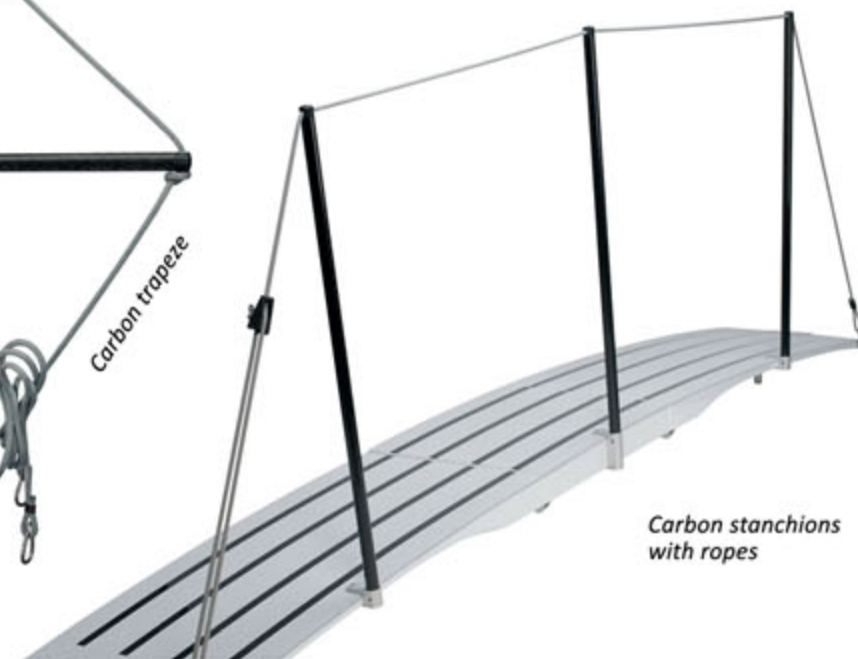

Mirror female fitting
stainless steel 316
(ø 25 mm)

Carbon trapeze

Safety catch - turns
foldable gangway
to solid type

Carbon stanchions
with ropes

Carefully designed GS Composite accessories make these gangways even more versatile. Extremely durable bags protect gangways and yachts, from scratches even when stored in a lower deck or locker among other equipment. Three different female stainless steel fittings assure a proper and safe fixture on varying boats. For even safer way to board, the gangways can be equipped with lightweight carbon stanchions on left or right side. All gangways can be easily converted from foldable to solid with a special stainless steel safety catch. For using a gangway on a lifting line, carbon trapeze is the perfect choice.

CARBON CUSTOMISATION

Custom color

Teak / Flexiteek finish

Custom written name

Custom graphic design

GS Composite's special anti-slip thread not only provides a safe way to board, especially when wet, but also allows to make the gangway very unique. Available in light grey/white color, and made from polyurethane with a small rubber parts, the gangways can be personalized with a boat's name, logo, etc. To provide a perfect color match with boat, gangways are available in any color from RAL chart. All gangways can be upgraded with teak or flexiteek to match a boat's decking and provide aesthetic and anti-slip performance. No special maintenance is required on any of anti-slip threads.

GS COMPOSITE UPGRADE

Hey Mike!

I think it's time to check
for new accessories...
